RE: Risk-based Assessment for Monsanto-J.F. Queeny Facility Clean
Closure Demonstration

Dear Mr. Roberts:

Enclosed are two documents: a closure inspection report of the Monsanto-J.F. Queeny container storage pad drafted by the Missouri Department of Natural Resources (MDNR) on January 11, 1995; and a response to the above-referenced report in the form of a risk-based assessment for the container storage pad prepared by the Monsanto Company in March of 1995.

Please review both documents and provide the Hazardous Waste Program (HWP) with the Missouri Department of Health's comments on the risk assessment. The HWP will then incorporate these comments into a response to the Monsanto Company.

If you have any questions, please contact Mr. Brian McCurren, Environmental Engineer, at (314) 751-3176.

Sincerely,

HAZARDOUS WASTE PROGRAM
